PROFESSIONAL SUMMARY

Driven and analytical Computer Science & Engineering student with targeted domain experience across Machine Learning, Computer Vision, and Generative AI architectures. Proven technical capacity to engineer automated document search systems, deploy computer vision trackers for live streams, implement content filtering recommendations, and adopt specialized engineering toolchains including prompt engineering, AWS cloud contexts, and GitHub Copilot workflows.

TECHNICAL & SOFT SKILLS

Core Competencies: Machine Learning, Computer Vision, Generative AI, Prompt Engineering, Full-Stack Integration, Content-Based Filtering, Document Parsing & Retrieval

Developer Tools & Technologies: Python, HTML/CSS, JavaScript, Git/GitHub, GitHub Copilot, AWS Basics, Google Cloud Platform (GCP) Basics

Professional Attributes: Collaborative Development, Prompt Optimization, Continuous Learning, Technical Agility

PROFESSIONAL EXPERIENCE

Fox Trading

April 2026 – June 2026

Machine Learning Intern (Remote)

Lucknow, India

- Successfully completed an intensive industrial program focused on building, training, and deploying end-to-end machine learning models under professional industry mentorship.
- Human Action Detection:** Engineered a computer vision system using live streaming data to track and classify real-time human activities.
Repository: github.com/ankushnanshal/Human-Action-Detector
- Bike Sharing Demand Prediction:** Developed a predictive regression model to forecast urban rental patterns and optimize resource allocation.
Repository: github.com/ankushnanshal/Bike-Sharing-Demand-Prediction
- Diabetes Prediction:** Built a robust classification model utilizing clinical datasets to evaluate and analyze patient health risks.
Repository: github.com/ankushnanshal/Predict-Diabetes

PROJECTS & OPEN-SOURCE CONTRIBUTIONS

Document Searcher

- Designed and developed an automated tool to parse, index, and query text within documents efficiently, improving information retrieval speed and context tracking.
Repository: github.com/ankushnanshal/Document-Searcher

PVC Panel Modern Display (Open-Source Contributor)

- Contributed to a modern, dynamic web dashboard application designed to display interior product catalogs seamlessly, focusing on performance, layout styling, and front-end interface adjustments.
Repository: github.com/vermaAtul1520/pvcpanel-modern-display

Movie Recommendation System

- Developed and implemented a personalized content filtering recommendation system leveraging data science workflows to predict and suggest films based on user preferences and movie metadata.
Repository: github.com/ankushnanshal/Movie-Recommendation

EDUCATION

IET Lucknow (Institute of Engineering and Technology)

Expected May 2028

Bachelor of Technology: Computer Science & Engineering

Lucknow, India

CERTIFICATIONS & PROFESSIONAL EDUCATION

Introduction to Generative AI — <i>Google Cloud (via Simplilearn)</i> Credential ID: 10374702 • Core foundational knowledge of GenAI models and cloud implementations.	June 2026
Introduction to Prompt Engineering with GitHub Copilot — <i>Simplilearn</i> Credential ID: 10374414 • Practical applications of automated code generation tools and contexts.	June 2026
Foundations of Prompt Engineering — <i>Amazon Web Services (AWS)</i> Strategic structural formatting of natural language prompts across diverse LLM systems.	June 2026
AI For All — AI Appreciate & AI Aware — <i>Intel</i> Comprehensive validation on artificial intelligence awareness, framework impacts, and digital literacy.	June 2026
AI Literacy — <i>IBM</i> Agnostic foundational skills covering artificial intelligence ecosystems and conceptual ethics.	June 2026
Machine Learning Internship & Project Certification — <i>1Stop.ai</i> Verification: 1stop.ai/verify-certificate • Validation for deployment across three core machine learning pipelines.	June 2026
